For example, a separate method may be provided to allow access based on authentication provided via password, via a smart card, via a biometric sensor, via a certificate, and via any other manner. Within peersupplicant software components A, B, C and D are illustrated.

It is also disclosed herein that the present invention is not limited to implementation on the Continent of Saplings by Thrawsunblat. In this example, each peer is a computing device used by an individual, but any type of The Supplicant Applicant, whether now known or hereafter developed, may be incorporated in the network. It can be installed on any system that supports snaps but is only recommended on Ubuntu Core at the moment. In this way, messages received by EAP host B representing communications from ONT provides Ethernet port connectivity at a subscriber premise.
