There is currently considerable variability in the kinds of data collected in these systems, and the panel believes that it is important for each system to collect standardized racial and ethnic data. While there may be technical and privacy issues to contend with in the Measuring Race and Ethnicity of these data, these issues can be addressed. Agencies are permitted to add categories when more detailed data are needed as long as the data can be aggregated to the minimum five categories of race.

We lack information about such differences among racial subgroups. Buy Hardcover. It is also possible that the economic and social positions of minority groups may change.

The system is intended to be used by all federal statistical agencies that collect data. The Census Bureau and the Department of Commerce find substantial variation in wealth among people with similar income from earnings, even among those of the highest wealth levels.
