PlanningandScheduling.BellHawkbyBellHawkSystems0reviews.An  
individual production system is usually analyzed in the  
literature referring to a single business, therefore it's  
usually improper to include in a given production system the  
operations necessary to process goods that are obtained by  
purchasing or the operations carried by the customer on the  
sold products, the reason being simply that since businesses  
need to design their own production systems this then becomes  
the focus of analysis, modeling and decision making also  
called "configuring" a production. ERP solutions are the keys  
to managing quality assurance at all points in the supply  
chain.
